

Declaration of Decontamination

Please add this document the shipping papers clearly arranged to the LEWA incoming goods department.

In order to avoid health hazards caused by noxious substances LEWA GmbH accept to repair pumps and components only that were thoroughly cleaned and decontaminated by the customer before.

To ensure that such demand is met we would ask you to sign the Declaration below when contamination has been successfully carried out. Please send this Declaration to our contact address before despatching the pump.

Should we receive pumps which are contaminated with environmentally harmful substances we reserve the right to return the equipment to the sender or to have it cleaned by a certified company; in both cases, the costs will be at the sender's expense.

Moreover, we would ask you to describe the damage on the pump, and to earmark the required repair and test processes. Thus, you enable us to submit you our most favourable offer and to minimize repair time.

Declaration of Decontamination

This is to declare that the specified equipment was expertly cleaned from dangerous substances. Should – despite the cleaning measures - the pump equipment still represent a hazard for the environment, LEWA GmbH are authorized to have the equipment cleaned by a certified company at our expense.
